# Plasmid for Biopharma

## Plasmid DNA for vaccine and gene therapy research

The demand for plasmid DNA of the highest purity has significantly increased and has become an essential tool in life science research as well as the modern biotechnology industry. Newer applications like mRNA based vaccines and gene therapy are fields in which quality plasmid purification tools have proven to be essential. MN offers various solutions for high quality and endotoxin-free plasmid DNA from mini to giga scale supporting different applications like viral vector production used by the biopharmaceutical industry.
